

Capita IB Solutions specialises in the Design and Delivery of Bespoke Software Solutions to meet their customers' specific needs, delivering a reliable, cost effective, quality solution.

Providing Intelligent Solutions

Through delivery of solutions that utilise the latest available technology, we provide a proven, low risk and cost effective solution to cater for our customers' current and future business needs.

Our focus is to enhance our customers' systems and provide solutions to current challenges. This can provide additional functionality to existing systems or provide a new system to bridge a gap in service.

Capita IB Solutions provide a full Web, Intranet and Extranet development service. Using in-house skills in Java, .Net, VB6, XML, XSLT to name a few.

Our software development team have the skills required to deliver an extensive range of applications to the Web.

Additionally we have added mobile technology to our delivery solutions using a combination of JAVA and .Net enabling mobile working in the field.

Solutions

This enables us to gather field data for incorporation into a business solution. Using our Framework Development Process we are able to accommodate fast design, development and delivery to help customers' achieve effective solutions.

Additionally, the Business Performance Monitor (BPM) has been introduced to provide pro active reporting of business critical information such as financials, business data, field

data from mobile technology, and can be customised for any Key Performance Indicator inclusion that our customer's require for their application.

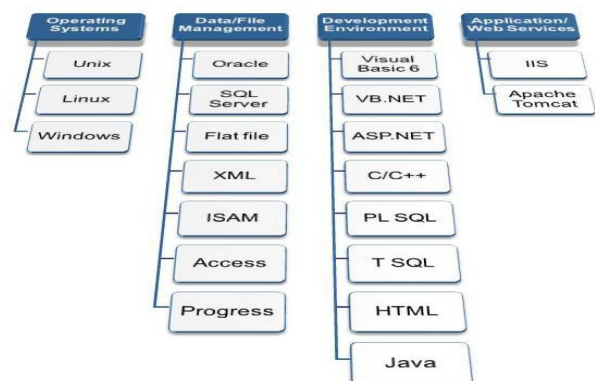

Our objective is to deliver a solution that uses our customers' methodology, working practices and terminology to ensure the solution is familiar in appearance and easy to use.

We work to our customers' deadlines ensuring our solutions are available on time.

At Capita IB Solutions we listen to our customers so that we can deliver a solution which matches their needs while ensuring that we stay within budget.

The diagram shown opposite summarises some of the technical skill sets available within the company.

It is these skills that have been and are currently being utilised in a wide range of projects including Internet and Extranet design, E-Procurement solutions including XML message handling and B2B solutions, supporting seamless processes for transaction reporting.

Features

- Easy to Use
- Can be customised to interface with other software
- Tuned to your specific needs
- More flexible than packaged software

Business Benefits

- Significant business advantage over your competition
- Incorporate business processes that are specific to you
- Specifically designed for your particular requirements

Professional Services

Capita IB Solutions has an excellent track record of delivering expert support and consulting to Public, Private and Not for Profit Organisations. Ranging from top-down business analysis and enterprise modelling to database design, application implementation and tuning, a comprehensive package of methodologies, support, training and consultancy services has been developed to ensure the success of all projects within a defined framework of quality, cost and time.

Business Strategy

Our consultants can work with you to ensure your business strategy is supported by coherent and business-aligned systems.

Technical Support

We offer a full range of technical consultancy and support services to ensure the effective delivery of your Integra solution.

Healthchecks

Our regular healthchecks review the solution architecture and recommend changes or enhancements.

Implementation & Design

We assist clients during all phases of the development life cycle, with teams encouraged to acquire the knowledge to maintain and support the systems.

“A custom application may be a better solution than standard, off the shelf, software application. Off the shelf software is designed for a wide range of businesses and may not be ideally suited for a specific business.”

Web-Based Design & Development

We specialise in using our web-based design and development skills to enhance our customers' systems, delivering a solution that meets their specific requirements, within budget.

The particular benefit that we offer in this area is that we can provide solutions on the back of 30 years of experience to a wide range of transaction based business systems.

In addition we have deployed systems using mobile technology and the customisation of business reporting using the Business Performance Monitor has enabled us to achieve major success in our delivery of modern solutions embracing the very latest technology.

The following list includes just some of the applications we have delivered for businesses:

- Purchase to Pay applications
