

Oracle Accelerate

Finance & Accounting

There's no reason why smaller businesses or government entities shouldn't have the same capabilities as larger enterprises. Oracle Accelerate gives small and medium businesses easy-to-own, industry-specific solutions at an affordable price.

Solutions for Small and Medium Businesses

Speed. Efficiency. Responsiveness. Flexibility. These are the hallmarks of successful businesses. Information technology is a critical component in your strategy to succeed, but many small and medium businesses worry that business applications - especially those proven in large enterprises are costly, complex, and out of their reach.

That's simply not true. More than 19,000 small and medium businesses have discovered that Oracle Applications give them the competitive edge that larger companies have long enjoyed, all within their means.

Oracle has created Oracle Accelerate especially for small and medium businesses.

Oracle Accelerate delivers simply-priced bundles of applications; rapid implementation tools and implementation services delivered by Capita IB Solutions, to minimise start-up time and risk.

Using a fixed-scope approach, Oracle Accelerate substantially reduces the complexity of more traditional, large-scale implementations.

Industry Focussed Solutions for your Unique Requirements

Often, smaller businesses are faced with a no-win choice: a "lite" version of an enterprise application that isn't flexible enough to support future business growth, or an application package designed only for smaller businesses.

Neither provides the flexibility you need or the ability to scale with your business as it grows.

Oracle offers a third choice: customer-proven applications that work well for businesses of any size.

Oracle Applications scale to fit your needs, both now and in the future, and are available for a wide range of industries: aerospace and defense, automotive, chemicals, consumer products, education, engineering and construction, financial services, healthcare, high technology, industrial manufacturing, life sciences, media and entertainment, natural resources, oil and gas, professional services, public sector, retail, telecom, travel and transportation, and utilities.

And Oracle has the right applications for all your business needs, including business analytics, financials, procurement, projects, order and inventory management, customer relationship management (CRM), supply chain management, manufacturing, human resources, and sales force automation.

Comprehensive Solutions to Meet your Needs Today and Tomorrow

The Oracle Accelerate advantage is not only about having the latest and greatest business software. It's also about having applications that work well together and are easy to implement, eliminating the inefficiencies that disparate or customised systems can create when you need to access information across business processes.

With thousands of customers and years of experience, Oracle understands the business-process flows of your industry.

Now, with Oracle Accelerate, your business can take full advantage of this experience, freeing you to focus on running your business, instead of on how to make information systems work together.

Features

- Best-in-class functionality
- Comprehensive set of applications
- Industry-Specific
- Open solutions
- Rapid deployment

Business Benefits

- Built-in integration and best practices within standardised business processes
- Decreases the cost and time of implementation

Professional Services

Capita IB Solutions has an excellent track record of delivering expert Oracle support and consulting to Public, Private and Not for Profit Organisations. Ranging from top-down business analysis and enterprise modelling to database design, application implementation and tuning, a comprehensive package of methodologies, support, training and consultancy services has been developed to ensure the success of all projects within a defined framework of quality, cost and time.

Business Strategy	Technical Support	Healthchecks	Implementation & Design
Our consultants can work with you to ensure your business strategy is supported by a complete and deliverable Oracle solution.	We offer a full range of technical consultancy and support services to ensure the effective delivery of your Oracle solution.	Our regular healthchecks review the solution architecture and recommend changes or enhancements.	We assist clients during all phases of the development life cycle, with teams encouraged to acquire the knowledge to maintain and support the systems.

“With Oracle we are able to very quickly and cost-effectively achieve visibility into our entire organisation, making us better able to make smart business decisions. Oracle is instrumental in helping us remain a leader in our sector.”

Unlimited Possibilities for Limited Budgets

Every Oracle Accelerate solution features out-of-the-box, industry-specific business analytics and intelligence.

By taking advantage of industry best practices and business accelerators that enable rapid implementation, Oracle Accelerate gives you a comprehensive solution without the expense of customisation and complex systems integration.

Even better, as your company grows, Oracle’s applications grow right along with you, so you avoid the expensive rip-and-replace costs of other inflexible, non-scalable solutions.

Easy-to-own Solutions with Predictable Value

Installing and maintaining software can be difficult, especially in smaller businesses that may not have dedicated software-maintenance staff. Oracle Business Accelerators are powerful, easy-to-use, rapid-implementation solutions that walk you through industry-specific business requirements and system preferences, and then set up the Oracle Applications for you.

Oracle Business Accelerators not only deliver predictable, high-quality and reliable results geared to your industry, they also make it easy for any business to get up and running quickly and efficiently.

If you own or operate a small or medium business and are still concerned about the costs and effort of installing and maintaining enterprise software on your premises, you need not worry. Oracle offers much of its software when and where you need it via Oracle On Demand.

All you need is an internet connection and a Web browser, and Oracle deploys and maintains the applications for you on our servers. Not only does this reduce your costs, it also gives you “anywhere, anytime” access to those business-critical applications.

No matter how you have your Oracle Applications delivered, you can count on Capita IB Solutions and the Oracle support team whenever you need it.

Oracle is the first enterprise software company to be honoured with a customer service award from J.D. Power and Associates, so you can be confident that you’ll be backed by one of the highest levels of support in the industry.
