

Integra Reporting & Analysis

Business Intelligence

Timely management information delivered to the right people, in the right format is one of the key benefits offered by Capita IB Solutions. The solution includes standard deliverable reports as part of the implementation as well as user definable financial, management, statutory reports and statistical analysis and enquiries.

Integrated Business Solutions

Capita IB Solutions is ideally placed to offer clients flexibility for both software solutions and delivery methodologies.

We provide and support Oracle Financials eBusiness Suite and Integra Enterprise eFinancials.

Both of which can be delivered on your own hardware, self managed by your organisation or through a tailored Managed Service. We also provide fully hosted solutions from our established data centre.

Our comprehensive reporting solution allows proactive management of financial and non-financial data.

User driven analytical tools ensure the delivery of timely and accurate information.

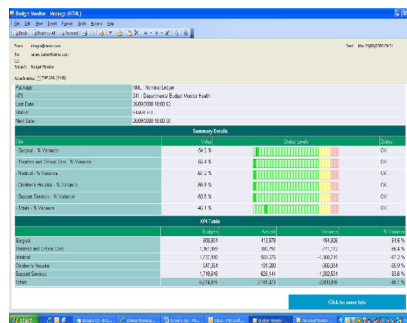

Transforming Data into Knowledge

Timely management information delivered to the right people, in the right format is one of the key benefits offered by Capita IB Solutions.

The solution includes standard deliverable reports as part of the implementation as well as user definable financial, management, statutory reports and statistical analysis and enquiries.

A single point of entry is provided for enquiries, reports, performance indicators and alerts.

Whether reports are run online, distributed automatically or set as Key Performance Indicators to continually monitor business activities, the solution ensures you can focus on delivering a best value service rather than searching for information.

Pro-active Reporting

System standard local authority reports, alongside user definable reporting, provide meaningful financial and non-financial information, allowing accurate presentation of the organisation's position.

This supports the proactive management of your organisation.

Financial and Statistical Analysis

A user driven statistical enquiry tool is provided to analyse information. All data is 'pre-mapped' in a reporting universe to allow quick retrieval of data.

This intuitive screen supports users in their review of complex data, helping them to gain a greater understanding of core management information

Business Alerts

The Integra Workflow system automates business processes by passing data, documents and information electronically within your organisation according to a predefined set of rules.

Alerts can also be defined to monitor changes to individual values and keep selected users informed.

This allows business critical information to be monitored closely and business processes to be streamlined; supporting a move towards paperless processes and subsequent efficiencies.

Features

- Dynamic reporting & analysis tools
- Easy to use
- Fully integrated with Integra
- Single point of entry for all data analysis

Business Benefits

- Analyse and gain insight
- Analysis of financial and statistical data
- Timely and accurate delivery of information
- Continual monitoring of organisational performance

Professional Services

Capita IB Solutions has an excellent track record of delivering expert support and consulting to Public, Private and Not for Profit Organisations. Ranging from top-down business analysis and enterprise modelling to database design, application implementation and tuning, a comprehensive package of methodologies, support, training and consultancy services has been developed to ensure the success of all projects within a defined framework of quality, cost and time.

Business Strategy

Our consultants can work with you to ensure your business strategy is supported by coherent and business-aligned systems.

Technical Support

We offer a full range of technical consultancy and support services to ensure the effective delivery of your Integra solution.

Healthchecks

Our regular healthchecks review the solution architecture and recommend changes or enhancements.

Implementation & Design

We assist clients during all phases of the development life cycle, with teams encouraged to acquire the knowledge to maintain and support the systems.

“Delivering information to 1000’s of end users that is useful, timely and accurate for critical decision making. Ensuring easy access to this information over the web, securely, while saving time on the management of your reports.”

Performance Indicators

Both statutory and local indicators can be monitored, for example prompt payment.

Targets specify the level of performance to be achieved for a particular time period, with traffic light status displaying performance against target.

Therefore business activity can be quickly assessed, allowing your organisation to operate efficiently.

Scheduled Delivery

Functionality to schedule and distribute management reports is key to all organisations.

The solution allows the timely and accurate delivery of information to key members of staff. For example, a Budget Manager can receive their budget statement electronically at a predefined time, with full drill down capabilities.

Benefits of the Capita IB Solutions Approach

- An efficient and robust solution based on our experience gained over many years;
- The provision of a “one-stop shop” facilitating a faster and more efficient support procedure;
- Response with one call to the company where all the knowledge is in-house; and
- Easily facilitated software upgrades for those clients contracted to hosted and managed services.
