Online Dog Licensing System Data Sheet

iSOFT Business Solutions has developed an Online Dog Licensing System, which is intended to improve the current system of Dog Licensing in Ireland and save Councils time and money by streamlining the licensing process.

The Benefits

- Saving 95% per transaction
- Automatic updating of system
- Convenient
- Greater compliance
- e-Government friendly

The system allows owners to apply for, pay for and receive their dog licence online within minutes, saving the local authority at least 95% per transaction and ensuring that records are accurately updated at the same time. Everybody wins!

iSOFT Business Solutions provides the technology, security and services to ensure a smooth transaction all at the click of a button.

County Councils can save thousands of Euros annually by allowing dog owners to manage their dog licence applications online. Providing a better service to the end-user instead of paying An Post €3.50 for each registration.

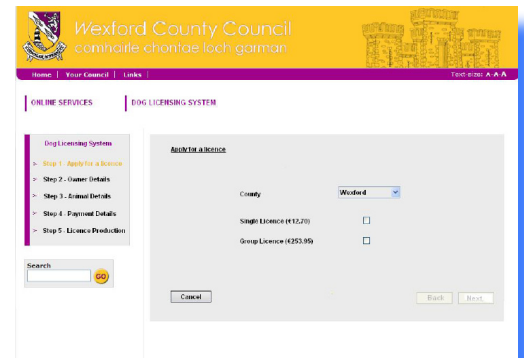

Cost Savings

Number	AN Post Charge	Online Charge	Saving
1000	€3500	€200.00	€3,200
2000	€7,000	€400.00	€6,600
5000	€17,500	€1,000	€16,500

Integrated with Council Website

A user can connect to the system via the Council's own website.

They will be directed to the Dog Licensing screen, where they will be guided through the process from application to payment and invited to print out the licence. This is all carried out online in a seamless fashion (see below).

The users are provided with an easy, convenient system and the Council saves money, avoids data entry and increases the accuracy of its records.

The system enables applications for Single or Group licences, and it is possible to register multiple dogs in the same visit.

When all the dogs have been entered the system will allow users to make a payment via credit or laser card.

About iSOFT Business Solutions

iSOFT Business Solutions, part of the iSOFT Group, is a market leader in providing world-class integrated business software solutions to service centric organisations. With a product and services portfolio of outstanding depth, its offerings extend from eProcurement and bespoke solutions to enterprise wide financial management solutions, which provide efficiencies across the entire organisation.

iSOFT Business Solutions has a presence in all key markets across UK, Ireland, Hong Kong and Australia, with infrastructure services extending coverage to approximately 35 countries worldwide. Leveraging the strengths, innovation and global reach of its parent company, iSOFT Business Solutions ensures it meets the needs of its customers, which include large organisations, small and medium enterprises, not for profit and public sector organisations.

Integrated Finance Management

The system can be fully integrated into any Council's existing financial management system, which is in line with e-Government initiatives such as providing better services to the customer while improving efficiency.

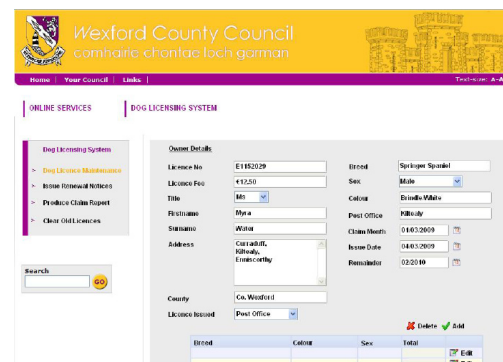

Security Ensured

The system has been built with security as a high priority. No personal information or credit/laser card information is kept by the system.

Back Office Processing

Currently, when a licence is issued by An Post a copy is returned to the Council and the information relating to the owner and the dog is recorded manually by the operator, including when the licence is due for renewal.

iSOFT Business Solutions' Dog Licensing system records this information online and can send out a reminder letter to the owner when the licence is due for renewal.

The solution is delivered via a web-based application, which means that no software is required to be installed on the PC.

For owners who continue to register their dog with An Post, the Council is allowed to record the details of the licence (see lefthand side) that was issued but with the added benefit of issuing reminder letters.

Naturally, if people register online the information will automatically be transferred back to the central system. The system also includes comprehensive reporting capabilities.

Don't waste any more time.
